

Insight 1:

<https://public.tableau.com/profile/chiranjeev.singh#!/vizhome/BestTrasportation/Story1?publish=yes>

Summary: Visuals show that more people in USA states prefer to commuting alone in car, truck or van and making drive a best transportation in USA.

Texas has the highest total of people commuting alone with mean commute total of 5,692 as compared to other states.

Design: I kept the color of bar charts to same so that viewers will not distract what these/that color(Eg: might be red color create confusion about some kind of alert).

Resources: N/A

Insight 2:

https://public.tableau.com/profile/chiranjeev.singh#!/vizhome/IncomeandPovertyacrossUSA/Income_Poverty_across_USA?publish=yes

Summary: Visualization shows the poverty of various USA states having construction experience and what is the total income of coastal states in USA.

Texas has more poverty with more construction experience. In other words, increase in construction experience also increase the poverty of state.

Non-Coastal states in USA have more income as compared to coastal states of USA.

Design: I've selected to create a group and put this group to color mark so that viewers can easily identify what portion of USA contains the coastal states and non-coastal states.

Resources: Google to get the list of coastal states.

Insight 3:

https://public.tableau.com/profile/chiranjeev.singh#!/vizhome/StatePopulation_15/Statepopulation?publish=yes

Summary: This visual was prepared to show the total population in USA states. California has the highest total population of 38,421,464 whereas, Wyoming has the lowest with 579,679.

Design: I kept the color of bar charts to same so that viewers will not distract from the important things. Using many colors may distract from the important thing.
